

dan wilder

UX Designer | Web Developer

With 7+ years' experience in design and development, I am efficient at addressing user needs with high quality design and software. I am a qualified creative thinker with a strong background in design and computer science.

Experience

OneTrust

Web Developer | March 2022 - Present

At OneTrust, I collaborate with a team of developers to deliver enhancements, fixes, and escalated support responses for their suite of corporate websites. I am responsible for producing consistent, quality code that meets technical requirements within SCRUM-based sprints.

Convercent by OneTrust

Front End Developer | July 2021 - March 2022

For Convercent, I leverage front-end technologies to develop user-oriented and responsive web pages. I am responsible for writing and maintaining efficient code, identifying potential improvements to technical SEO, providing insight and direction for UX design, and understanding current industry standards.

zavvie

Web Developer | June 2020 - July 2021

At zavvie, my main responsibilities included end to end web development in a php environment, user research and prototyping, UX/UI design, managing Google Analytics, as well as providing high quality assurance standards, all for a SaaS product.

Navjoy Consulting Services

Digital Designer | March 2019 - June 2020

As the lead Digital Designer for Navjoy, I provided creative direction and production for UX/UI design, end to end web development for branding, marketing, and client projects, and oversaw the creation and execution of marketing campaigns through google services.
